## Purpose

As the Civil Aviation Regulatory Commission (CARC) has decided to change the regulation concerning the mechanics licence, into an EASA Part 66 based format, it is necessary to add some limitations on new licences.

The requirements according to removal of these limitations are defined into the Appendix IX of new JCAR Part 66 regulation.

This procedure describes the practical methods of application of these requirements.

## Field of application

This procedure applies to personnel holder of Part 66 licence obtained by conversion of their protected rights and having one or several limitations.

## Principle of requirements to remove a limitation

The following tables in annexes have been created according to JCAR Part 66 Appendix I.

Personnel wishing to apply this requirement must pass the exams and justify the practical experience corresponding to the limitation printed on their licence.

It is not necessary to follow the training corresponding to the module but the exam has to be passed within the CARC office.

If the applicant has followed training within a Part 147 training organization, the justification of experience should be divided by 2.
