

القائمة النهائية

لقطع غيار نظام الارصاد الجوية MET

في المطارات الثلاث ٢٠٢٣

Manufacture : VAISALA

| #   | Description                                            | Part number                                             | Quantity |
|-----|--------------------------------------------------------|---------------------------------------------------------|----------|
| 1.  | Window Blower                                          | CLB 311                                                 | 2        |
| 2.  | DIGI Port Server TS 16 MEI for Amman – Marka airport   | DIGI Port Server TS 16 MEI(115-230 VAC/80 A / 50-60 HZ) | 1        |
| 3.  | MODEM                                                  | DMX55                                                   | 3        |
| 4.  | MODEM                                                  | DXL 421                                                 | 1        |
| 5.  | Runway Light interface unit                            | RSI50                                                   | 1        |
| 6.  | Controller / Receiver of PWD22                         | PWC22                                                   | 2        |
| 7.  | RAINCAP Double-Plate RAIN Sensor                       | PWR111                                                  | 1        |
| 8.  | Interface Unit of LT31                                 | LTi 111/211                                             | 1        |
| 9.  | Battery Charger Module of LT31                         | QBR101C                                                 | 1        |
| 10. | Master CPU with present weather activation LTC212 PWSR | LTC 211                                                 | 1        |
| 11. | Background Luminance                                   | LM21                                                    | 1        |
| 12. | Field Calibrator                                       | LMA 21                                                  | 1        |
| 13. | Ultrasonic Wind Sensor                                 | WS425                                                   | 1        |
| 14. | Humidity & Temperature Probe                           | HMP155                                                  | 1        |
| 15. | Data Collection Hardware Data Logger                   | QML 201                                                 | 1        |
| 16. | Ceilometer engine Board                                | CLE321                                                  | 1        |
| 17. | Ceilometer Window                                      | CLW311                                                  | 1        |
| 18. | SHDSL Modem                                            |                                                         | 2        |
| 19. | HDD server with QAIA configuration                     | HP100G – 300G                                           | 2        |
